

# To miracles and beyond!

Patrick's journey began with challenges even before birth, as his mom faced complications during pregnancy. Arriving eight weeks early into the world meant a stay in the Neonatal Intensive Care Unit, a place filled with specialized equipment and dedicated experts. Thanks to the support of Children's Miracle Network Hospitals, Patrick received the critical care he needed to thrive, surrounded by a team committed to his well-being. Today, he's a happy and healthy four year old, a testament to the power of community support and advanced medical care.

Your gift to the **Children's Miracle Network** allows us to educate our staff on medical advances essential to providing the best care for our smallest patients, like **Patrick**
